Own Mug!*

Addicted to Plastic

The film focuses on the worldwide production and environmental effects of plastic. Take a global journey to investigate what we know about this material of a thousand uses and why there's so darn much of it! On the way, discover a toxic legacy, and the people striving to clean it up. (85 minutes)

Discussion facilitator:

Dr. Judith Perlinger,
Dept of Civil & Environmental Engineering,
Michigan Technological University,
studies how the molecular structure of organic chemicals influences their transport and transformation in the environment.
