Time: 7:00-8:30 pm; followed by coffee, dessert and facilitated discussion
Cost: FREE; $3 suggested donation

(Credit: Teachers may earn 0.6 SB-CEUs for attending 4 films)

January 17  River Planet - explores the very different environmental, cultural and social issues around how humans and wildlife interact with six major rivers on our planet. (29 min.) Discussion Facilitator: Evan McDonald, Keweenaw Land Trust, will discuss local efforts to protect and steward the Pilgrim River Watershed—a local area highly desirable for future urban development.

Feb. 21  Last Call at the Oasis - Be it through consumption or contamination, water is becoming more scarce globally, including in the United States. (108 min.) Discussion Facilitator: Alex Mayer, MTU Dept of Civil & Environmental Engineering

March 14  The Strange Disappearance of Bees - Across the globe, the disturbing mass death of bees has more than just beekeepers worried—at least one-third of the world’s food relies on bee pollination. (58 min.) Discussion Facilitator: Melissa Hronkin, Apiarist & proprietor of Algomah Acres Honey Farm www.algomahacreshoney.com

April 18  Switch - Join energy visionary Dr. Scott Tinker as he explores the world’s leading energy sites, from coal to solar, oil to biofuels, many highly restricted and never before seen on film. (98 min.) Discussion Facilitator: Dr. Wayne Pennington, MTU Dept. of Geological & Mining Sciences & Engineering

May 9  Chasing Ice - Acclaimed environmental photographer James Balog ventures to the Arctic to document the melting of ice mountains using state-of-the-art time lapse photography. Chasing Ice depicts a photographer trying to deliver evidence and hope to our carbon-powered planet. (76 min.) Discussion Facilitator: Dr. Sarah Green, MTU Dept of Chemistry

Cosponsored by Lake Superior Stewardship Initiative, Michigan Tech Center for Water & Society, Keweenaw Unitarian Universalist Fellowship and Keweenaw Land Trust
